Description: Add pre-formatted text to an existing plot.

Usage: Daisy(labels=character(), spacing=2, justification=1,
xpd=T, ...)

Arguments:

labels: passed to `text`.

spacing: a factor applied to `strwidth("N")` (one en space)
to produce spacing between baselines.

justification: 1, 1:2, or 2 for left, center, or right
justification.

xpd: passed to `text`.

...: passed to `text`.

Value:

The en space (width) and em space (height), which could be used to
compute formatted text for `Daisy`.

Details:

The defaults are designed for monospace type with spacing
proportional to 1/10 inch (pica) character spacing and 5 lines
per inch. Specify `spacing=5/6` for (1/10):(1/6) proportions.

Examples: See the accompanying file, Daisy.README.pdf.make.R
